1. All statements made herein of our own knowledge are true and all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this application or any patent issuing thereon.
2. This application is a continuation of Serial No. 07/613,592 which is a continuation-in-part of Serial Nos. 07/448,307 and 07/589,295.

3. We understand the subject matter presently claimed in claim 226 of this application is as follows:

- 226. A recombinant vector comprising a DNA regulatory element operably linked to a DNA molecule that encodes a wild-type, human cystic fibrosis transmembrane conductance regulator protein, wherein the DNA molecule is capable of stable propagation in *E. coli*. --

4. We further understand that the subject matter presently claimed in claim 227 of this application is as follows:

- 227. A recombinant vector comprising a DNA regulatory element operably linked to a DNA molecule encoding the cystic fibrosis transmembrane conductance regulator protein of Table 1, wherein the DNA molecule is capable of stable propagation in *E. coli* as a result of:

- (a) said DNA regulatory element permitting maintenance of the DNA molecule in *E. coli* at a low copy number, or

- (b) said nucleotide sequence of the DNA molecule being modified to disrupt its expression in *E. coli* while allowing its expression in mammalian cells. --

5. We understand that claims 226 and 227 are thus limited to recombinant vectors.

6. We are informed and believe that no other subject matter currently is claimed in this application.

7. As to Sucharita Paul, I, together with Richard J. Gregory and Kathleen M. Hehir, am listed as co-inventor of Serial No. 07/448,307 and, together with Richard J. Gregory, Seng H. Cheng, Alan Smith, Sucharita Paul, and John Marshall, as co-inventor of Serial No. 07/613,592. In 1990, I was involved in DNA sequencing at Genzyme Corporation. While I believe I may have contributed to the subject matter of other claims of Serial No. 07/448,307 and Serial No. 07/613,592, I do not believe I am an inventor of the subject matter of claim 226 or the subject matter of claim 227.
9. As to Seng H. Cheng, I, together with Richard J. Gregory and John Marshall, am listed as co-inventor of Serial No. 07/589,295 and, together with Richard J. Gregory, Alan Smith, Sucharita Paul, Kathleen M. Hehir, and John Marshall, as co-inventor of Serial No. 07/613,592. In 1990, I was involved in antibody work at Genzyme Corporation. While I believe I may have contributed to the subject matter of other claims of Serial No. 07/589,295 and Serial No. 07/613,592, I do not believe I am an inventor of the subject matter of claim 226 or the subject matter of claim 227.
